EDUCATION

Smt. Indira Gandhi College of Engineering

Aug 2019 – June 2023

B.E. Computer Engineering - **CGPA - 8.2**

Navi Mumbai, India

Ramniranjan Jhunjhunwala College of Science(HSC)

Aug 2017 – May 2019

Junior College - **Percentage - 70.15**

Mumbai, India

TECHNICAL SKILLS

Languages : C++, Dart, Python, JavaScript, Golang, SQL, NoSQL

Developer Tools : VS Code, Android Studio, Docker, Jupyter Notebook

Technologies/Frameworks : Flutter, Flask, Firebase, Hyperledger-Fabric, GitHub, Git

COURSEWORK / SKILLS

- Android Development
- Data Structures & Algorithms
- Block-chain
- OOPS Concept
- Web Development
- Artificial Intelligence
- Hyper-Ledger

PROJECTS

News Classifier Application | Flutter, Flask, API, Machine Learning

May 2022

- Built a **mobile News application** based on **flutter** which classifies news
- Used **News-REST API** to fetch news details
- Used **Flask** to deploy **Machine Learning model**
- [GitHub repo](#)

ChatWalk | Flutter, Firebase

Nov 2021

- Built a real-time video and audio chat **mobile application** based on **Flutter**
- Implementation of **Firebase** for back-end services
- Implementation of **SQLite** as a database for storing account information and chat logs in encrypted format
- Authentication of Accounts with **Firebase authentication**
- [GitHub repo](#)

Vehicle Management Website | HTML, CSS, JavaScript, django

June 2021

- Built a mechanic-centred **scheduling website** which does allotment of time-slots to customer based on **Django** queries
- It provides features like **dashboard** for mechanic, admin and customer along with **authentication** for all users
- [GitHub repo](#)

ACHIEVEMENTS

- Appeared for **HACK TO HIRE** Scholarship Challenge and secured **21st** Rank among **1500+** candidates
- Participated in **Flipkart GRiD 4.0** along with **team of 4 people**

CERTIFICATIONS

- [Foundations: Data, Data, Everywhere Google](#)
- [Deep Learning with Python](#)
- [Building RESTful APIs with Node.js and Express](#)
- [Building Block-chain apps using Ethereum & Hyper-ledger Fabric](#)
